

CATALOGUE OF DISEASE.

PILES! PILES!!

The cause of this troublesome, unpleasant disease always arises from impure blood, indigestion, &c. To cure any disease you must first remove the original cause that produces it. Bull's Sarsaparilla not only purifies the blood, *but it will make new blood.* This may appear strange but nevertheless it is true. Mr. Bull has made a discovery, which is no less than the power of medicine to produce blood, on the same principle that healthy food will produce flesh. His Sarsaparilla creates new, pure, and rich blood, consequently invigorates the system. It is a great blessing to the weak and debilitated.

A gentleman of high standing thus writes—

"I have been distressed for four years with the piles; my sufferings have been intense, and my physician had recommended an operation as the only means of relief. Bull's Sarsaparilla was advised, and I have used one bottle, and so far as I can judge am fully and entirely cured. I cannot refrain from expressing my anxiety to have its qualities more extensively known. Please send me six bottles as there is none in this city. ****

Vicksburg, Miss., Sept. 9, 1848.

From the Lincoln Journal, Fayetteville, Tenn.
WONDERFUL AND ASTONISHING CURE.

Read and be convinced of the wonders that can be performed by the use of that truly great and extraordinary medical compound

DR. JOHN BULL'S SARSAPARILLA. MORE TESTIMONY.

We ask attention to the following certificate of E. E. Dismukes, testifying to the curative effects of Bull's Sarsaparilla. Mr. Dismukes is well known in this community as a highly respectable and worthy citizen, whose veracity will not be questioned by those who know him.

"This is to certify, that I have been afflicted with the PILES, and have tried every Patent medicine that I have seen recommended for the cure of this disease; and have also consulted several Physicians, and tried their remedies without obtaining any permanent relief. Some time in February last I saw Bull's Sarsaparilla advertised in the Lincoln Journal, and determined as a last resort to try it, I immediately procured of Webb & Smith the Agents at Fayetteville, Tenn., a half dozen bottles and resolved to give it a fair trial, and I am happy to say that after using one bottle I was entirely relieved of the disease; it is now two months since I commenced using this medicine and I have no symptoms of its return. I have also been afflicted with chills for the last two years, but since I commenced using the Sarsaparilla I have not had a chill, and my general health is very much improved. Having been so much benefited by this valuable medicine I feel it a duty I owe to the afflicted and the proprietor, to make public the beneficial effects I have derived from its use.

E. E. DISMUKES.

Lincoln Co. Tenn., Apl 25, 1850.

Fort Desmoines, Iowa, Apl. 10, '51.

DR. JOHN BULL.—*Dear Sir.*—During the past winter, my wife was afflicted very severely with the Yellow Jaundice; and after following the prescriptions of physicians for several weeks, without any beneficial result, she commenced taking your Sarsaparilla; and on taking one bottle, the skin assumed its natural color, and by the time she had taken two bottles she was entirely well.

Yours truly,

L. D. WINCHESTER.

ERUPTION ON THE FACE.

A BAD CASE CURED.

DR. JOHN BULL.—*Dear Sir.*—I take pleasure in recommending your Sarsaparilla to the public, for I can do so without the least scruple of conscience, especially for the disease with which I was afflicted. I had a breaking out on my face, which persons call the "Barber's Itch," for a number of years; and at times a solid scab would form on my chin and face. I tried a great number of remedies, but failed to obtain relief, until I tried your Sarsaparilla. The use of two bottles has effected an entire cure. I therefore recommend it to all similarly afflicted.

FRANCIS OTTOWELL

Louisville, March, 1848.

FRANKLIN Co., Sept. 15, 1849.

MR. JOHN BULL.—I have been afflicted with what the physicians call dyspepsia, for about three years, I have consulted with and followed the prescriptions of some of the most eminent doctors in the country. But alas! none of them could do me any good. For six or eight months my bowels were either very costive, or very loose, I was much afflicted with alternate diarrhoea and costiveness, the former producing intense griping, sickening, pains in the region of the umbilicus and lower bowels. The latter producing pains in the head, giddiness, and dimness of sight. Thus I suffered more than I thought man could suffer and live; and what was worse, there was no one to sympathize with me, though I was wasted until I was a mere skeleton, being nothing but skin and bones. The doctors would tauntingly say "he has only got the belly ache, and no one ever died with the belly ache, he will get well after a while."

Thus, when I was hardly able to stand alone, when I only weighed ninety pounds, I was persuaded, ah! persuaded, for I had tried every thing else in vain, to try your compound extract of Sarsaparilla. The first bottle stopped the diarrhoea, producing gentle, and as I think, healthy evacuations of the bowels. I have been using the extract for six weeks; I have gained some sixteen or twenty pounds of flesh, my color is somewhat improved, and I think I am getting well, and shall continue the use of your truly valuable medicine.

I am, sir, respectfully yours,

LUTHER R. SULLIVAN.

CATALOGUE OF DISEASES.

THE LETTER.

INTERESTING TO THE LADIES.

The following beautiful and highly flattering letter, addressed to Dr. Bull, is from the pen of the accomplished lady of Dr. JOHN T. COOKE, one of the oldest and most eminent physicians in the State of Indiana. Any one who is curious enough, can see the original by application to the Doctor's office, 81 Fourth-st.

MOUNT VERNON, Dec. 15, 1849.

DR. JOHN BULL—SIR: Permit me to say to you, for the benefit of the afflicted female community, that about twelve years ago I took a chronic disease of the stomach and digestive organs, and a general debility and derangement of the whole system.—My liver and bowels were in so torpid a state that it was, at all times, with the utmost difficulty that I could get any medicine to act on my bowels, and most generally I had to resort to the most drastic cathartics, which would leave me in a delicate state. I was not often confined to my bed; but my health was always bad; I was very much troubled with the sick head-ache and costiveness, and could not take animal food for five or six years without its producing bad effects; I have had constant cold feet during that time, and was very much troubled with distressing and violent attacks of cramp. I have also had, for the last five or six years, a distressing cutaneous eruption, from which I never could get any permanent relief, and no female has ever suffered more from Prolapsus Uteri and Fluor Albus than I have, together with the Piles. I have been under the treatment of several physicians for the above diseases, without any permanent relief.—In April last I was persuaded to try S. P. Townsend's Sarsaparilla: I took five bottles of it without the least apparent relief, and took no other medicine for six weeks, when my health became much worse. I was then prevailed upon to try your Compound Extract of Sarsaparilla: with much reluctance I consented to try it, and on taking the first dose I discovered it to be much stronger than any other I had been taking; I could feel a warmth through my whole system, and before I had finished the first bottle I found myself improving in all my complaints; I have taken five bottles of it, and have not had a single paroxysm of cramp or cold feet since I commenced taking it. I eat animal food without any inconvenience; my appetite is remarkably good, my bowels perfectly regular, and my digestive organs have as good tone as ever they had. I am not troubled with head-ache or sick stomach as formerly; my entire health is better than it has been for ten years, and I am well satisfied it has been entirely accomplished by taking your Compound Extract of Sarsaparilla. I esteem it as one of the most valuable medicines ever invented for all chronic diseases to which it is applicable, if taken according to your directions, and continued a sufficient length of time to have the desired effect on the system.

ANN-L. COOKE.

AS A FEMALE MEDICINE

IT IS

WITHOUT A RIVAL!

This Sarsaparilla is a sovereign and speedy cure for incipient consumption, barrenness, prolapsus uteri, or falling of the womb, costiveness, piles, leucorrhoea, or whites, obstructed or difficult menstruation, incontinence of urine, or involuntary discharge thereof, and for the general prostration of the system, no matter whether the result of inherent cause or causes produced by irregularity, illness, or accident. Nothing can be more surprising than its invigorating effects on the human frame. Persons of all weakness and lassitude, from taking it once become robust and full of energy under its influence. It immediately counteracts the nervelessness of the female frame, which is the cause of barrenness. It will not be expected of us in cases of so delicate a nature, to exhibit certificates of cures performed, but we can assure the afflicted, that hundreds of cases have been reported to us. Thousands of cases where families have been without children, after using a few bottles of this invaluable medicine, have been blessed with fine and healthy offspring. It has been expressly prepared in reference to female complaints. No female who has reason to suppose she is approaching that critical period, "*the turn of life*," should neglect to take it, as it is a certain preventative for any of the numerous and horrible diseases to which females are subject at this time of life. This period may be delayed for several years by using this medicine. Nor is it less valuable for those who are approaching womanhood, as it is calculated to assist nature by quickening the blood and invigorating the system. Indeed, this medicine is invaluable for all the delicate diseases, to which women are subject.

It is the safest and most effectual medicine for purifying the system, and relieving the sufferings attendant upon child-birth ever discovered. It strengthens both the mother and child, and prevents pain and disease, increases and enriches the food; those who have used it, think it indispensable. It is highly useful both before and after confinement, as it prevents diseases attendant upon child-birth. In costiveness, piles, cramps, swelling of the feet, despondency, heartburns, vomitings, pain in the back and loins, false pains, hemorrhage, and in regulating the secretions, and equalizing the circulation, it has no equal. The great beauty of this medicine is, it is always safe, and the most delicate use it most successfully.

As a beautifying agent, it is far superior to all cosmetics and lotions in use, producing a clear and beautiful skin, rosy cheeks, removing freckles and pimples. A hint to the young ladies is sufficient.

CATALOGUE OF DISEASE.

THE following communication, giving an account of a remarkable cure occasioned by the use of Bull's Sarsaparilla, is from JAMES I. DOZIER, Esq., one of our oldest citizens. We were aware of the affliction of his daughter, and we cannot but regard her cure as the most striking of the many evidences afforded of the rare virtues of Bull's Sarsaparilla. — *Louisville Morning Courier.*

Louisville, May 15th, 1850.

W. N. HALDEMAN—*Sir:* More than three years ago, my daughter, Sally Ann Dozier, was attacked with Scrofula. Every means that promised to subdue the disease were resorted to and used by her, under the directions of the most learned physicians, without yielding even a prospect of success. The disease exhibited, externally, all its horrid ravages, and I lost all hope of any other than a fatal termination.

Several months ago, I saw an account of the wretched malady having been cured by the use of Dr. John Bull's Sarsaparilla. My daughter was anxious to try it, and I purchased two bottles of it. They were used as the labels on the bottles directed, and there was striking change for the better, for several weeks, when the amendment ceased to be progressive. I had noticed this with regret, and it occurred to me that I would change the *quantum*. I directed her to take three teaspoonsful, three times each day, for eighteen or twenty days, and then abandon its use entirely for eight or ten days. At the expiration of that time, resume its use by teaspoonsful, for the same time—and to give this mode of its administration a fair trial. She adopted my directions, and the effect proved two things—that the medicine would cure; and, that my mode of using it was proper. Nine bottles effected a complete, and, I am satisfied, a radical cure—she is well. The discolorations arising from the lacerations and burstings of the many frightful tumors, incident to the disease, are rapidly disappearing under the application, to the parts, of *fish brine*.

I have, sir, stated the facts just as they have occurred. There are many persons, among the first in the city, who know my daughter, and know how sad has been her condition for three years past. I write this for no reward, whatever—it is only written in the hope that it may be of benefit to others. It is right that I should say Dr. Bull knows nothing about it.

Yours, respectfully,

JAMES I. DOZIER.

LOUISVILLE, March 12, 1849.

Dr. John Bull—*My dear Sir:*—I would not think of writing this letter, and allowing you to give publicity to it, was I not morally certain of the contents, of its strict truth, and which has been demonstrated to me by experience incontrovertible.

From the use of the four bottles of your Compound Extract Fluid of Sarsaparilla, I have been healed and relieved of pain so torturous as to be indescribable, and I shall as long as I live, feel a cordial respect and the warmest gratitude to you, as benefactor to your race, by the introduction of this great balm to the afflicted.

For the last six or eight years my left leg has pained me constantly, but the pain was particularly excruciating in damp weather. The cause for its disease originated in my receiving upon the shin bone a very severe blow, which gave me great pain at the time, and which is nearly eight years since; this caused disease of some kind or other to fasten upon the limb, which continued to pass upwards to the hip joint and there seated itself. At times the fleshy parts of the leg would become callous and hard, and the pains arising from it being so excessive caused me to employ physician after physician, and from none could I get the least particle of relief. At last I was induced to take the Sarsaparilla, and in this I have found perfect relief, my limb now possesses its natural feeling, and for one I speak from practical experience. I know your medicine relieved me, and I advise every body who may have a chronic affection of the limbs or body, not to delay the use of the medicine prepared by you, for it will relieve them certain and sure. It seems to make the cure by causing a reaction in the general system, producing general good health; first bringing about a healthy action of the stomach, and cleansing and purifying the blood.

I write you this and allow you to publish it, with a wish to do good alone, for I know "the healthy know not of their health, but only the sick," and when the latter shall take its advice, they will thank me for it.

Yours, respectfully,

JOSEPH YUCE,

Copper and Tinsmith, Sixth st.

Mr. Youce has been a citizen of Louisville for many years, and is well known to be a man of great truth. All who are disposed to be convinced of the wonderful virtues of Dr. John Bull's Sarsaparilla, can be satisfied by calling on him at his shop. Mr. Youce has said publicly that he would not be in the condition he was before the use of Dr. John Bull's Sarsaparilla, for thousands of dollars. Call and be convinced.

11th month.

NOTHING BUT AN INSECT.—A French naturalist spent several years in examining the structure of a single insect, and left the work unfinished. The number of lenses in the eye of a common fly is six or seven thousand; of the dragon-fly, twelve thousand; of the butterfly, seventeen thousand. The house-fly's wing has a power of six hundred strokes in a second, which can propel it thirty-five feet. So thin are the wings of many insects, that fifty thousand placed over each other would only be a quarter of an inch thick, and yet, thin as they are, each is double.

 The excesses of youth are drafts upon old age, payable with interest. If you would then be happy when aged, be temperate while young.

 Religion is an insurance against fire in the next world, for which honesty is the best policy.
